

NOTE TO EMPLOYER: As your employee, I am requesting that you review this document, provide the requisite information, and sign the form, in regards to your requirement that employees get a Covid-19 emergency use authorization (EUA) investigational vaccine.

1) If I agree to receive an EUA Covid-19 injection, does my employee **health insurance plan** provide complete coverage should I experience an adverse event, or even death?

2) As an employee, does my **life insurance policy** provide any coverage in the event that I die from receiving an EUA Covid-19 injection?

3) As an employee, will you be providing **Workers' Compensation, disability insurance, or other resources** if I have an adverse event to an EUA Covid-19 injection and am unable to come to work for days, weeks, or months, or if I am disabled for life?

4) The Food and Drug Administration (FDA) requires that EUA vaccine recipients be provided with certain vaccine-specific information to help them make an informed decision about vaccination.⁸

The EUA fact sheets that must be provided are specific to each authorized Covid-19 injection and are developed by the manufacturers of the injections (Pfizer/BioNTech, Moderna, Oxford/AstraZeneca, and the Johnson & Johnson subsidiary Janssen). The fact sheets must provide the most current and up-to-date information on the injections, and vaccine recipients must also receive information about adverse events. Have you read, understood, and provided me (and all other employees) with these fact sheets and with current information on adverse events so that I/we can make an educated decision?

5) Have you reviewed the available databases of material adverse events reported to date for people who have received Covid-19 injections?^{9,10,11,12} Potential and reported adverse events include death, anaphylaxis, neurological disorders, autoimmune disorders, other long-term chronic diseases, blindness and deafness, infertility, fetal damage, miscarriage, and stillbirth.

6) The FDA’s guidance¹³ on emergency use authorization of medical products requires the FDA to “ensure that recipients are informed to the extent practicable given the applicable circumstances... **[t]hat they have the option to accept or refuse the EUA product....**” Are you aware of this statement? Have you informed all employees that they have the option to refuse?

7) With respect to the emergency use of an unapproved product, the Federal Food, Drug and Cosmetic Act, Title 21 U.S.C. 360bbb-3(e)(1)(A)(ii)(I-III)¹⁴ reiterates that individuals be informed of “**the option to accept or refuse administration of the product**, [and] of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks.” If EUA Covid-19 investigational vaccines are ever approved by the FDA, state legislation would be required to allow companies to mandate the Covid-19 injections. Are you aware of these facts?

8) EUA products are unapproved, unlicensed, and experimental. Under the Nuremberg Code—the foundation of ethical medicine—no one may be coerced to participate in a medical experiment. The individual’s consent is absolutely essential. No court has ever upheld a mandate for an EUA vaccine. In *Doe #1 v. Rumsfeld, 297 F. Supp. 2d 119 (2003)*¹⁵, a federal court held that the U.S. military could not mandate EUA vaccines for soldiers: “...[T]he United States cannot demand that members of the armed forces also serve as guinea pigs for experimental drugs” (*Id.* at 135). Are you aware of this?

9) The United States Code of Federal Regulations¹⁶ and the FDA require the informed consent of human subjects for medical research. The EUA Covid-19 injections are unapproved, unlicensed, investigational vaccines that are still in their experimental stage. It is unlawful to conduct medical research on a human being, even in the event of an emergency, unless steps are taken to secure the **informed consent** of all participants. Are you aware of this?

10) According to Federal Trade Commission (FTC) Guidelines¹⁷ and the FTC’s “Truth In Advertising,”¹⁸ promotional material—and especially material involving health-related products—cannot mislead consumers, omit important information, or express claims. All of this falls under the rubric of “deceptive advertising” (whereby a company is providing or **endorsing a product**), whether presented in the form of an ad, on a website, through email, on a poster, or in the mail. For example, statements such as “all employees are required to get the Covid-19 vaccine to make the workspace safe” or “it’s safe and effective” leave out critical information. Critical information includes the facts that Covid-19 injections are unapproved EUA vaccines that “may” or “may not” prevent Covid, won’t necessarily make the workspace safer, and could in fact cause harm. Not providing links or attachments of the manufacturers’ fact sheets and current information on adverse events is omitting safety information. Are you aware of this?

11) Since the Covid lockdowns began over one year ago, there have been over 178 reported breaches of unsecured protected health information (PHI), incidents investigated by the Office for Civil Rights (OCR). These breaches exposed millions of people’s personal health information. Although many of these incidents were attributed to hacking, some of the breaches to PHI fell directly under the 1996 Health Insurance Portability and Accountability Act (HIPAA), such as sharing a patient’s or person’s information with an unauthorized individual or incorrectly handling PHI.¹⁹ **Can you please explain your obligations to me, under HIPAA law, and how you are going to protect my personal information - both with respect to your requirement that I receive this injection?**

12) Whereas pharmaceutical companies that manufacture EUA vaccines have been protected from liability related to injuries or deaths caused by experimental agents since the PREP Act¹ was enacted in 2005, companies and all other institutions or individuals who mandate experimental vaccines on any human being are not protected from liability. Are you aware that you do not enjoy such liability protection?

13) Are you aware that employees could file a **civil suit against you should they suffer an adverse event, death, or termination from their place of employment?**

As the legally authorized officer of the employer/company, I have read all of the above information, have provided my employees with all of the information that the FDA requires be provided to recipients of the Covid-19 injections, and do hereby agree to assume 100% financial responsibility for covering any and all expenses from adverse events, including death, through insurance coverage or directly. In addition, I affirm that the employee will not be subjected to the loss of their job should they decline to receive a Covid-19 injection.
